

IMPORTANT SAFEGUARDS

When using electrical appliances, basic safety precautions should always be followed, including the following:

1. Read all instructions.
2. Do not touch hot surfaces. Use handles or knobs.
3. To protect against electrical shock, do not immerse cord, plugs or cooking unit in water or other liquid.
4. Close supervision is necessary when any appliance is used by or near children.
5. Unplug from outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts.
6. Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions, or has been damaged in any manner. Return appliance to the nearest authorized service facility for examination, repair or adjustment.
7. The use of accessory attachments not recommended by the appliance manufacturer may cause fire, electric shock or injury.
8. Do not use outdoors.
9. Do not let cord hang over edge of table or counter, or touch hot surfaces.
10. Do not place on or near a hot gas or electric burner, or in a heated oven.
11. Extreme caution must be used when moving an appliance containing hot oil, or other hot liquids.
12. To disconnect, turn control to "off," then remove plug from wall outlet.
13. Do not use appliance for other than intended use.
14. Avoid sudden temperature changes, such as adding refrigerated foods into a heated pot.

SAVE THESE INSTRUCTIONS

POLARIZED PLUG

This appliance has a polarized plug (one blade is wider than the other). As a safety feature this plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature.

How to Use

IMPORTANT NOTE

During initial use of this appliance, some slight smoke and/or odor may be detected. This is normal with many heating appliances and will not recur after a few uses.

1. Vegetables are usually added to the cooker first, as they take longer to cook than meat. Pare and thinly slice or dice.
2. Trim fats and wipe meats well to remove residue. (If meats contain fats, brown in a separate skillet or broiler and drain before adding to cooker.) Season with salt and pepper. Place in cooker on top of vegetables.
3. For roasts and stews, pour liquid over meat, moistening well. Use no more liquid than specified in the recipe. Why? Because in slow cooking, more juices in meats and vegetables are retained than in conventional cooking.
4. Always cook with the lid on, for recommended time.
5. Unplug when cooking is done or before cleaning.

TO CLEAN

Caution: Never Submerge
Crock-Pot Heating Unit in Water

Models With Removable Stoneware

- The removable stoneware goes safely into the dishwasher, or may be washed in hot soapy water as soon as possible after emptying. Do not use abrasive cleaning compounds—a cloth, sponge or rubber spatula will usually remove the residue. To remove water spots and other stains, use a non-abrasive cleaner (Bon-Ami® Polishing Cleanser) or vinegar.
- The metal liner may be cleaned with a damp cloth or scouring pad, or sprayed lightly with an all-purpose cleaner, to maintain original sheen.

Models Without Removable Stoneware

- After emptying your CROCK-POT, fill with hot or warm soapy water to loosen food remains. Do not use abrasive cleaning compounds—a cloth, sponge or rubber spatula will usually remove the residue. If necessary, a plastic cleaning pad may be used. Use a non-abrasive cleaner (Bon-Ami® Polishing Cleanser) or vinegar to remove water spots and other stains.

Either Model

- The outside of the CROCK-POT may be cleaned with a soft cloth and warm soapy water. Wipe dry. Do not use abrasive cleaners.
- The lid may be washed in the dishwasher; plastic lid must be placed on top rack.

Hints

- There are two temperature settings. Low is recommended for slow "all-day" cooking. One hour on High equals about 2 to 2½ hours on Low.
- Do not use cooker for thawing or cooking frozen meats (such as roasts or chicken) **unless** you first add at least 1 cup of warm liquid. The liquid will act as a "cushion" to prevent sudden changes in temperature. Cook recipes containing frozen meats an additional 4 to 6 hours on Low or 2 hours on High.
- Most vegetables should be thinly sliced and placed near sides or bottom of the CROCK-POT. (An unusual characteristic of the CROCK-POT is that meats generally cook faster than most vegetables—depending on the age of the vegetables.)
- Use whole leaf herbs and spices for best and truest flavor for all-day cooking. If ground herbs and spices are used, they should be stirred in during the last hour.
- Because there is no direct heat at the bottom, always fill CROCK-POT at least half full to conform to recommended times. Small quantities may be prepared but cooking time will be affected.
- A specific liquid called for in a recipe may be varied if an **equal** quantity is substituted. (Such as substituting a 10¼-ounce can of soup plus 4 ounces of water for a 14½-ounce can of tomatoes OR ½ cup beef or chicken broth for ½ cup wine, etc. . . .)
- Dried beans, especially red kidney beans, should be boiled before adding to a recipe. Cover the beans with 3 times their volume of unsalted water and bring to a boil. Boil 10 minutes. Discard water after boiling.

Beans must be softened **completely** before combining with sugar and/or acid foods (Note: Sugar and acid have a hardening effect on beans and will prevent softening). After boiling beans 10 minutes, reduce heat, cover and allow to simmer 1½ hours or until beans are tender. Soaking in water, if desired, should be completed before boiling. Discard water after soaking or boiling.

- Do not use the CROCK-POT for storage of foods.
- Do not reheat foods in the CROCK-POT.

Questions and Answers

Q "What if the food isn't done after 8 hours . . . when the recipe says '8 to 10 hours'?"

A This is due to voltage variations which are commonplace everywhere. Or altitude. Or even extreme humidity. The slight fluctuations in power which occur everywhere do not have a noticeable effect on most appliances. They can slightly alter the cooking times in the CROCK-POT due to the extended cooking times. Allow plenty of time, and remember, it is practically impossible to overcook. You will learn through experience whether to use the shorter or longer time given.

Q "Must the CROCK-POT be covered? Is it necessary to stir?"

A Cook with the cover on. Avoid frequent removal of the cover for checking cooking progress or stirring. Significant amounts of heat escape whenever lid is removed; therefore, the cooking time must be extended. The CROCK-POT lacks the ability to recover heat losses quickly when cooking on Low setting. Never remove cover during first two hours when baking breads or cakes.

It's not necessary to stir while cooking on Low heat. While using High for short periods, occasional stirring improves the distribution of flavors throughout the entire recipe.

Q "How about thickening the juices or making gravy?"

A Make it right in your CROCK-POT! Retain all that delicious flavor! Add some quick-cooking tapioca to any recipe when you want a thick gravy. Add the tapioca at the beginning and it will thicken as it cooks! Or you may remove foods from the pot, leaving the juices. Prepare a smooth paste of approximately ½ cup flour or cornstarch to ½ cup water or 4 tablespoons melted butter. Pour mixture into liquid in the CROCK-POT and stir well. Turn to High and when it comes to a boil (about 15 minutes) it is ready.

Q "Can I cook a roast without adding water?"

A Yes—if cooked on Low. We recommend a small amount because the gravies are especially tasty. The more fat or "marbling" the meat has, the less liquid you need. The liquid is needed to properly soften and cook vegetables.

Guide for Adapting Recipes

This guide is designed to help you adapt recipes to the CROCK-POT—your own favorites and prized recipes collected from friends, food companies, newspapers and magazines. Our aim is to save preparation time with fewer steps and dishes . . . and to keep cooking simple.

In most cases, all ingredients can go into your CROCK-POT in the beginning and can cook all day. Many preparatory steps are unnecessary when using the CROCK-POT. A few hints:

- Allow sufficient cooking time.*
- Cook with cover on.
- Do not add as much water as some recipes indicate.
- Remember—liquids don't "boil away" as in conventional cooking. Usually you'll have more liquid at the end of cooking instead of less.
- It's "one-step" cooking: many steps in the recipes may be deleted. Simply add ingredients to the CROCK-POT at one time and cook 8 to 12 hours (add any liquid last).
- Vegetables do not overcook as they do when boiled in your oven or on your range. Therefore, everything can go into the CROCK-POT at one time. Exception: milk, sour cream or cream should be added during last hour.

TIME GUIDE

IF RECIPE SAYS:	COOK IN CROCK-POT:
15 to 30 min.	1½ to 2 hrs. on High OR 4 to 6 hrs. on Low*
35 to 45 min.	3 to 4 hrs. on High OR 6 to 10 hrs. on Low*
50 min. to 3 hrs.	4 to 6 hrs. on High OR 8 to 18 hrs. on Low*

*Most uncooked meat and vegetable combinations will require at least 8 hours on Low

LIQUIDS

Use less in slow cooking—usually about half the recommended amount. 1 cup liquid is enough for any recipe unless it contains rice or pasta.

HERBS and SPICES

Leaf or whole herbs and spices are preferred, but their flavor power may increase—use half recommended amount. If you use ground herbs and spices, add during last hour of cooking.

Adapting Recipes

BEANS

Dried beans, especially red kidney beans, should be boiled before adding to a recipe. Cover the beans with 3 times their volume of unsalted water and bring to a boil. Boil 10 minutes. Discard water after boiling.

Beans must be softened completely before combining with sugar and/or acid foods (Note: Sugar and acid have a hardening effect on beans and will prevent softening). After boiling beans 10 minutes, reduce heat, cover and allow to simmer 1½ hours or until beans are tender. Soaking in water, if desired, should be completed before boiling. Discard water after soaking or boiling.

SAUTEING VEGETABLES

Generally not necessary! Stir in chopped or sliced vegetables with other ingredients. Only exception: eggplant should be par-boiled or sauteed, due to strong flavor.

Since vegetables develop their full flavor potential with slow cooking, expect delicious results even when you reduce quantities. Because vegetables take longer to cook than meat, slice or chop them when possible.

PASTA and RICE

If recipe calls for cooking noodles, macaroni, etc., cook before adding to CROCK-POT. Don't overcook—just till slightly tender. If cooked rice is called for, stir in with other ingredients; add ¼ cup extra liquid per ¼ cup of raw rice. Use long grain converted rice for best results in all-day cooking.

MILK

Milk, cream and sour cream tend to break down during extended cooking. When possible add during last hour of cooking. Condensed soups may be substituted for milk, etc., and can cook for extended times.

SOUPS

Some soup recipes call for 2 to 3 quarts of water. Add other soup ingredients to CROCK-POT; then add water only to cover. If thinner soup is desired, add more liquid at serving time.

If milk-based recipes have no other liquid for initial cooking, add 1 or 2 cups water. Then stir in milk or cream as called for, and heat before serving.

Important Tips

2 Quart Model (3250)

- All recipes in this book must be reduced by one-half. If recipe calls for a 3 pound chicken or 3 to 4 pound roast, reduce meat weight to a 2 pound chicken or roast.
- For canned soups, tomatoes, or other foods select an 8 ounce can instead of a 14 to 16 ounce can or use one can instead of two.
- Some soups are available in single serving-sized cans and are perfect for half recipes.
- Use the same cooking time as indicated in the recipe.
- A meat rack and a Bread 'n Cake Bake pan are not available for this model.

3½ and 4 Quart Models (3½ Qt.: 3100, 3150; 4 Qt.: 3154)

- All recipes in this book may be prepared as shown for the 3½ or 4 quart models.
- Unless otherwise stated, recipes will make about 6 servings.

5 Quart Model (3355)

- All recipes may be prepared as shown for the 5 quart model. If desired, recipes may be increased by one-half. When a recipe may be doubled it will be indicated by a footnote. If a recipe is increased, cooking time may need to be extended.
- The size and shape of the 5 quart CROCK-POT is ideal for larger roasts (3 to 5 pounds), baking hens (3 to 4 pounds), and picnic hams (to 5 pounds). These weights depend on shape. Extended cooking times may be necessary for these larger cuts.

Care of Stoneware

As with any fine ceramic, the stoneware bowl of your CROCK-POT slow cooker will not withstand the shock of sudden temperature changes.

- Frozen foods such as vegetables and shrimp may be used as part of a recipe. However, do not thaw or cook large frozen foods such as roasts and chicken unless you first add at least 1 cup of liquid. See hints page 4.
- If the stoneware has been preheated or is hot to the touch, do not put in cold foods. Do not preheat CROCK-POT before using unless specified in the recipe. The CROCK-POT should be at room temperature before adding hot foods.
- To wash your CROCK-POT right after cooking, use hot water. Do not pour in cold water if the stoneware is hot.

Removable stoneware bowl is ovenproof and microwave safe. Do not use plastic lid in microwave or conventional oven. Do not use removable bowl on gas or electric burner or under broiler.

Removable stoneware: Prepare-ahead convenience! Fill stoneware bowl and refrigerate. When ready to cook, set in electrical base and turn to Low or High. Do not preheat electrical base.

Important Tips

2 Quart Model (3250)

- All recipes in this book must be reduced by one-half. If recipe calls for a 3 pound chicken or 3 to 4 pound roast, reduce meat weight to a 2 pound chicken or roast.
- For canned soups, tomatoes, or other foods select an 8 ounce can instead of a 14 to 16 ounce can or use one can instead of two.
- Some soups are available in single serving-sized cans and are perfect for half recipes.
- Use the same cooking time as indicated in the recipe.
- A meat rack and a Bread 'n Cake Bake pan are not available for this model.

3½ and 4 Quart Models (3½ Qt.: 3100, 3150; 4 Qt.: 3154)

- All recipes in this book may be prepared as shown for the 3½ or 4 quart models.
- Unless otherwise stated, recipes will make about 6 servings.

5 Quart Model (3355)

- All recipes may be prepared as shown for the 5 quart model. If desired, recipes may be increased by one-half. When a recipe may be doubled it will be indicated by a footnote. If a recipe is increased, cooking time may need to be extended.
- The size and shape of the 5 quart CROCK-POT is ideal for larger roasts (3 to 5 pounds), baking hens (3 to 4 pounds), and picnic hams (to 5 pounds). These weights depend on shape. Extended cooking times may be necessary for these larger cuts.

Care of Stoneware

As with any fine ceramic, the stoneware bowl of your CROCK-POT slow cooker will not withstand the shock of sudden temperature changes.

- Frozen foods such as vegetables and shrimp may be used as part of a recipe. However, do not thaw or cook large frozen foods such as roasts and chicken unless you first add at least 1 cup of liquid. See hints page 4.
- If the stoneware has been preheated or is hot to the touch, do not put in cold foods. Do not preheat CROCK-POT before using unless specified in the recipe. The CROCK-POT should be at room temperature before adding hot foods.
- To wash your CROCK-POT right after cooking, use hot water. Do not pour in cold water if the stoneware is hot.

Removable stoneware bowl is ovenproof and microwave safe. Do not use plastic lid in microwave or conventional oven. Do not use removable bowl on gas or electric burner or under broiler.

Removable stoneware: Prepare-ahead convenience! Fill stoneware bowl and refrigerate. When ready to cook, set in electrical base and turn to Low or High. Do not preheat electrical base.
